

5. Project Development Phase

Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Step-by-step ServiceNow implementation procedure

5.1 Create the Flow

- Open ServiceNow.
- Select All and search for Flow Designer.
- Open Flow Designer under Process Automation.
- Select New and choose Flow.
- Enter the flow name as “Standard Laptop Task”.
- Set Application to Global.
- Set Run As to System user and submit.

5.2 Configure the Trigger

- Select Add a trigger.
- Search for Service Catalog and select it.
- Click Done.

5.3 Configure the Catalog Task Action

- Under Actions, select Add an action.
- Search for and select Create Catalog Task.
- Drag the Requested Item Record into the Request item field.
- Confirm that the table is auto-populated as Catalog Task.
- Set Short description to “Laptop need to Configured”.
- Add a field value for Description and set it to “Laptop need to Configured”.
- Set Assignment group to Hardware.
- Set Approval to Approved.
- Leave the remaining fields at their defaults and click Done.

5.4 Save and Activate

- Save the flow.
- Click Activate and confirm Activate again when prompted.

5.5 Assign the Flow to Standard Laptop

- Open ServiceNow and search for Maintain Items from All.
- Open Maintain Items and search for Standard Laptop in the Name field.
- Open the Standard Laptop record and select Process engine.
- Remove the remaining automations as directed in the reference procedure and add the flow named Standard Laptop Task.
- Save the record using the menu.

5.6 Run the Request and Check the Result

- Open All and search for Service Catalog.
- Open Service Catalog, select Hardware, and choose Standard Laptop.
- Click Order Now.
- Open the request number to view the Requested Item record.
- Scroll to the Approvers section and approve the request as described in the reference.
- Open the Requested Item section and then the Requested Item record.
- Scroll to Catalog Tasks and open the task record.
- Check the updated status, short description, and assignment group.

5.7 Development Verification

The implementation is ready for review when the Standard Laptop request produces a Catalog Task showing the configured description and Hardware assignment group. The source procedure also instructs the user to inspect the task's updated status.
